BRATTONSOUND ENGINEERING LTD

ATLAS GUNSAFES®

Brattonsound has been manufacturing gunsafes for over 15 years and during that time has become the UK's leading manufacturer.

Atlas Gunsafes are designed and independently tested to exceed the requirements of BS7558/92. They are constructed from 3mm steel, have 4-point locking, and the lock is operated by a high security double bitted key.

Atlas Gunsafes have a generous depth enabling them to comfortably accommodate rifles with scopes, as well as shotguns. An extended gun divider holds the barrels 105mm from the back of the cabinet. This allows the scope to be positioned towards the back of the cabinet whilst maintaining the barrels in the vertical position.

Multi-Point Locking

Models

Ref	Model	H x W x D(mm)	Wt.(kg)
ATLAS 5	4/5 Shotguns Or Rifles With 213mm Internal Locking Compartment	1512 x 268 x 320	58
ATLAS 7	6/7 Shotguns Or Rifles With 213mm Internal Locking Compartment	1512 x 407 x 320	71
ATLAS C	4 Shotguns Or Rifles & Up To 12 Pistols (Or Accessories) With 213mm Internal Locking Compartment.	1512 x 407 x 320	75

Atlas 5

Atlas C

Double Bitted Key

The Atlas C has a partial width shelf assembly giving 4 compartments; each 320mm high (see photograph to left). These compartments are fitted with foam dividers to hold pistols, but if the dividers are not required they can be easily removed to give useful space for accessories etc.

BRATTONSOUND ENGINEERING LTD

THE TITAN GUNSAFE®

Designed for the customer seeking a far higher level of security than the minimum legal UK specification, The Titan Gunsafe greatly exceeds the requirements of BS7558/92.

When The Titan Gunsafe was tested to BS7558/92 we requested that it be subjected to a more onerous attack than laid down in the British Standard, and for an extended period of 30 minutes. The test laboratory was unable to gain access in this time and concluded that it would be highly unlikely for the operatives to remove the simulated weapons from The Titan Gunsafe, using the tools prescribed in the British Standard, for a number of hours, if at all. A copy of the test is available on request.

Brattonsound has been manufacturing gunsafes for over 14 years and during that time has become the UK's leading manufacturer. In designing The Titan Gunsafe we have drawn on our wealth of experience and listened carefully to the needs of our customers, enabling us to produce a cost effective gunsafe with a very high level of security.

The Titan Gunsafe is a secure, stylish and impressive complement to any treasured gun collection.

Multi-Point Locking

Internal Layouts

As standard The Titan Gunsafe will hold up to 13 Shotguns / Rifles and has a 221 mm high internal locking compartment (see photograph overleaf).

As an option The Titan Gunsafe can be factory fitted with a partial width shelf assembly giving four compartments of 320mm high (see photograph far right). These compartments are fitted with foam dividers to hold pistols, but if these dividers are not required they can be removed to give useful space for accessories etc. When fitted with this option The Titan Gunsafe still has a 221 mm high internal locker, but the capacity for Shotguns / Rifles is reduced to a maximum of 8.

Optional Electronic Keypad Lock

As standard the lock on The Titan Gunsafe is operated by a high security double bitted key.

As an option The Titan Gunsafe can be supplied with an Electronic Keypad Lock (illustrated right).

External Dimensions:

1510mm H x 500mm W x 375mm D
(59¹/₂" H x 19³/₄" W x 14³/₄" D)

Weight: around 95 kg (dependent on options)

Double Bitted Key

Optional Electronic Keypad

The Titan Gunsafe With
Optional Shelf Assembly

All sizes and weights shown are nominal.

BRATTONSOUND ENGINEERING LTD®

AUTO SENTINEL GUNSAFES®

Models

Ref	External Dimensions W/L x D x H (mm)	Useable Space W/L x D x H (mm)	Internal Door Opening Size W/L x D (mm)	Wt. (kg.)	Typical Usage
VS1	902 x 346 x 152	875 x 338 x 120	818 x 227	20	2 # Shotguns (Broken Down)
VS2	1185 x 346 x 152	1158 x 338 x 120	1101 x 227	25	2 # Shotguns (Broken Down), Or 2 # Shotguns - 28" Barrel (Fully Assembled), Or 2 # Rifles (Up To 1135mm Long)
VS3	1308 x 346 x 152	1281 x 338 x 120	1224 x 227	28	2 # Shotguns - 32" Barrel (Fully Assembled), Or 2 # Rifles (Any Reasonable Size)

The typical usage of each model is shown for guidance. Please ensure your guns will fit before purchasing an Auto Sentinel as they are designed as multi-use gunsafes to fit into small spaces, and not all types of guns fit any particular model. Large scopes on rifles might reduce the capacity to 1 rifle. Please also ensure that the gunsafe you require will fit in your vehicle (and/or space at home), before purchasing. If you require help with your purchase please speak to your stockist, or, telephone us and we will be pleased to advise you.

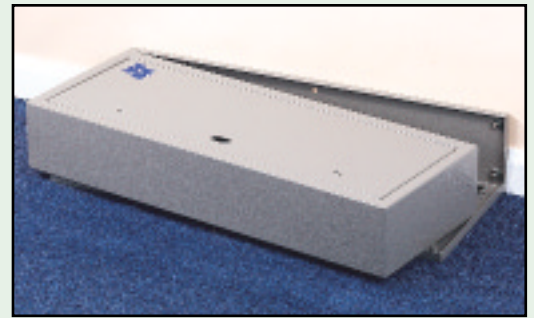

Removing The Foam Lining & Stowing Your Guns In Their Slips Enables You To Carry More Guns In The Auto Sentinel

Fit The Auto Sentinel In Your Vehicle

It Can Be Removed By The Keyholder In Minutes

With Our Optional Home-Fixing Bracket The Auto Sentinel Can Be Secured In Your Home In Minutes

Auto Sentinel® With Optional Home-Fixing Bracket

Fitting Methods

Vehicle Use

Vehicle Brackets - For Easy Release (Supplied As Standard). 4 fixing brackets, which are permanently fitted to the vehicle, to align with any 4 of the 8 fixing holes in the back of the Auto Sentinel. The brackets are fitted inside the vehicle, to the bodywork, and 4 small holes need to be cut through the carpet. The gunsafe is then easily secured to, and removed from, the vehicle by the use of 4 bolts (supplied) that can only be accessed by opening the Auto Sentinel. Removing the gunsafe leaves just 4 small brackets in the vehicle. Depending on the carpet thickness these brackets will either fit flush, or slightly protrude through the carpet.

Permanent Vehicle Fixing. If you are unlikely to frequently remove the Auto Sentinel from your vehicle you might prefer to bolt straight through 4 of the 8 fixing holes without using the Vehicle Brackets.

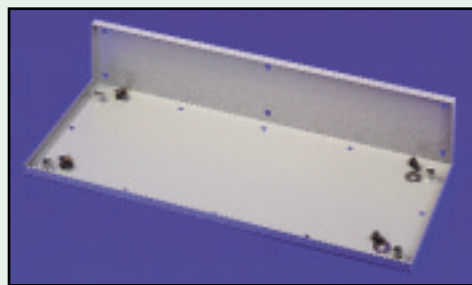

Home Use

Home-Fixing Bracket - For Easy Release (Optional Extra). Fit the Home-Fixing Bracket in your house and the Auto Sentinel can then be secured to, and removed from, the bracket by 4 bolts (supplied) that can only be accessed by opening the gunsafe. The Home-Fixing Bracket is ideal for the shooter who wants just one gunsafe for home and vehicle use.

Permanent Fixing. Dependent on the location of the gunsafe, and the type of floor, it might be acceptable to secure straight to your floor by using 4 or more of the 8 fixing holes in the back of the Auto Sentinel. As the police have to satisfy themselves that the gunsafe is securely fitted, we suggest that you discuss this with your inspecting officer before doing it. Alternatively you can drill extra fixing holes in the side or end of the gunsafe, so that it can also be secured to the wall.

Vehicle Brackets
(1 Fitted Under & Through Carpet)

Home-Fixing Bracket

Auto Sentinel® Permanently Fitted In The Home (Without Using Fixing Brackets)

Vehicle Security

If using the Auto Sentinel in a vehicle it is the users responsibility to ensure that a competent person properly fits the fixing brackets and/or gunsafe bearing in mind safety and security:

Safety: The vehicle brackets must be fitted in a way that does not jeopardise the integrity of the vehicle, or invalidate any vehicle warranty. For example the drill and/or fixing screws must not pierce the petrol tank, hydraulic pipes or wiring etc.

As each vehicle is different each will require its own fitting solution. However, the Auto Sentinel has a choice of 8 securing holes in the back, to be aligned with the 4 fixing brackets in the vehicle, and this gives plenty of choice when positioning the brackets.

Security: The brackets must be securely fixed to the vehicle for optimum security from the Auto Sentinel; there is little point in locking your guns away if the gunsafe is easily stolen from the vehicle.

All sizes and weights shown are nominal.

In line with our policy of continual product improvement Brattonsound reserves the right to modify specifications.

For further gun protection Brattonsound recommends the use of Super VP90 Corrosion Inhibitor by Napier of London.

Brattonsound operates an ISO 9001 Quality Assurance System.
